

Our Commitment to Sustainability

Marsh & McLennan Companies recognizes its responsibility to conduct business in a way that protects and improves the state of the environment for future generations.

As a global firm, we understand that the long-term wellbeing of society, the wellbeing of our colleagues, the strength of the global economy, and the continuing success of our own business depend on our commitment to a sustainable environment.

OUR FOCUS AREAS

REAL ESTATE

- Address real estate optimization across a portfolio of approximately 700 locations — containing more than 12 million square feet globally — to identify ways to quantify and reduce our carbon footprint through green leasing and unique space solutions.

PROCUREMENT

- Evaluate products and services for total value based on unit price, associated operating expense, transportation cost, disposal, and their overall environmental impact.

TECHNOLOGY

- Maintain six world-class data centers, home to more than 17,000 physical and virtual servers that host thousands of applications and systems, with a focus on energy efficiency.
- Utilize an End of Life Electronic Recycling Program, allowing us to expand our recycling footprint to include all regions around the world where we operate.

CORPORATE TRAVEL

- Focus on opportunities to strengthen relationships and environmental offerings of suppliers underlying our use of 400M air miles and 250K hotel nights annually.
- Educate colleagues on the environmentally friendly corporate travel options available.
